

How to Switch Chords FAST!

- Isolate the harder chord transitions of a song or exercise, such as **C to G**, **F to Bb** or **D to Em**.
- Think slow and smooth.
- Work on one transition at a time. (even for a few days!)
- Take note of your finger movements. Are they efficient?
- Repeat hard transitions MANY times slowly.
- Try the hover method. (See tutorial)
- Work on the switches IN TIME! (Add a count)
D 2 3 4 or **D DU 3 4**
- It's OK to switch on the last **up**, especially at faster tempos.
D DU UDU****
